Q. Okay. And the companies that you mentioned where you had the discussions of metal versus plastic, had you provided them your Palmaz Exhibit 5 as a -- to facilitate the discussion?

A. That -- I can't remember if it was this one or it was the first one. I really can't remember which one.

- Q. And by the first one, you're referring to today's Palmaz Exhibit 4. Is that correct?
- That's correct, yes.
- Q. So, one or the other --11
- 12 A. Yes.

- 13 Q. -- you would have provided --
- 14 A. Yes.
- 15 Q. -- to facilitate the discussion?
- 16 That's correct.

MR. HOWARD: And just for the record, there's been extensive testimony in the past as to which one he actually did give them.

- 20 Q. (By Mr. Armenio) Can you remember any other 21 company or person that you discussed metal versus 22 plastic?
- 23 A. At what time period?
- 24 Q. Why don't we go through 1985. Through the
- 25 end of 1985, did you have any other discussions with

please?

2 (Requested portion was read.)

A. I have given either one of these two documents to a few people in the radiology department where I was working in California. I believe there were some people in the vascular surgery area that I had given this document to, copies of this, and there were some people in my own department who I talked to and -- about these subjects, yes.

Q. (By Mr. Armenio) When you say in the 11 vascular surgery area, were those people at different hospitals?

A. I was working with a few hospitals. I 14 really can't remember exactly that, but they were people that I interacted with at the time.

16 Q. At this point, do you remember any names of 17 anyone you provided the article to, either 4 -- Palmaz 18 Exhibit 4 or 5, to facilitate the discussion of metal versus plastic? 19

A. There was a surgeon in Martinez who was also 21 working at UC Davis named Stanley Carson, and I had provided him with a copy of this -- one of these two 23 documents, and I did have discussions with him about metal versus plastics and what plastics and so forth, and I -- that's -- I probably had shown it to somebody

Page 47

anybody else, a company or a person, regarding metal versus plastic?

A. After I moved to Texas, I really had, you

know -- Let's put it this way: I was working harder on stents than I had before, and I was spending a lot of time reading. So, the amount of information I was picking up at the time was much larger, and, I mean, I was talking to so many people and reading a lot of stuff, I really can't remember, but I really progressed a lot in the subject between -- since I

10 11 moved, you know, from California to Texas.

Okav.

13 A. So, through '85 -- You know, I just cannot 14 tell you. Just the universe of -- My universe on the 15 stent work increased a lot.

16 Q. Okay. Other than the companies you've 17 mentioned, do you recall sending either Palmaz 18 Exhibit 4 or 5 to anyone during this time up to 1985 19 to facilitate a discussion about metal warrus-plassic?

A. 4 or 5 being these two documents?

21 Q. Yes, sir.

22 A. So -- I'm sorry. Can you repeat the

23 question?

24 Q. Sure.

MR. ARMENIO: Could you read it back,

Page 49

Page 48

else in surgery, but I really can't remember exactly 2 to whom --

Q. Okay.

A. -- at this time.

5 Q. So, other than the gentleman you just named 6 and the companies you named before, can you remember 7 any other person or company that you showed Palmaz 8 Exhibit 4 or 5 to up to the end of 1985 to facilitate 9 a discussion of metal versus plastic for use in 10 stents?

11 A. Well, again, I said when I came -- when I 12 came to Texas, we did talk to a lot of people, and, 13 so, the number of contacts increased after I moved to Texas. I had -- As I said, I had renewed interest in this area. I was doing a lot of animal research at 15 the time, and I did talk to more people, but I 16 17 can't -- just can't remember how many.

18 Q. Do you recall the time frame when you had 

20 plastic?

21 A. Yeah. I think it was -- It was early. I 22 can't remember when. I did show Dr. Carson my idea 23 and the possibility of using metal implants in 24 arteries. 25

Q. Was it before or after you moved to
